

IMAINT ADD-ONS

Expand the capabilities of iMaint with these modules:

- iMaint Cloud
- iMaint Integrator
- iMaint Mobile for
 - Windows
 - Android
 - iOS
- iMaint Dashboard
- iMaint Web Work and Purchase Requesters

iMaint Cloud

Access Your iMaint System Through the Internet

Users can access iMaint using Internet Explorer from any computers with network or Internet access—no additional software needs to be installed. You can even use both the standard Windows interface and the iMaint Cloud interface within your organization.

- Full iMaint capabilities
- No software to install; all that's needed is Internet Explorer
- No retraining—a similar look-and-feel as the iMaint Windows interface
- Users can access iMaint from multiple computers anywhere in the world

iMaint Integrator

Communicate with Other Applications and Systems

Integration between your maintenance system and other software systems is often essential, yet often very expensive and difficult to implement. The iMaint Integrator enables the application integration you need, simply and affordably. You can also automatically extract data for use in Excel or data analysis programs, import data from vendor lists or prior systems, and much more.

- Proven industry standards such as XML, SQL Server, Excel and more
- Easy to use tools guide you through setting up each project.
- Security safeguards protect your data
- Create 2-way communications with multiple business applications, or simply share files on a regular schedule

iMaint Mobile

The Power of iMaint in Your Hand

Extend the power of iMaint to handheld computers. Boost productivity, reduce paperwork and data entry errors, and increase employee efficiency. Give your maintenance staff instant access to critical information at the job location. Work orders, work requests and parts inventory can be managed with a few taps on the screen.

- Paperless maintenance management at the job site reduces travel time
- Create on-the-spot work requests and work orders
- Streamline inventory management—checkout parts using barcodes
- Better quality data collected at the source
- Dramatically reduce manual data entry
- Multiple options for connecting with iMaint: standard cradle, wireless network, or wireless Internet connection

DS004.030315

Maintenance management software for the enterprise, unequalled service for the user.

iMaint Dashboard

Keep Your Finger on the Pulse of Your Maintenance Operations

The iMaint Dashboard module allows you to monitor several Key Performance Indicators (KPIs) in real time, from one screen, without running reports.

- Real time data pulled from iMaint views and using iMaint security
- User defined set-points and tolerances as well as configurations, layouts and component filters
- Quickly discover trends and access the information behind the trend for better informed decision-making

iMaint Web Requesters

Anytime, Anywhere Work and Purchase Requests via the Web

Users can submit a work or purchase request from anywhere in the world, on any computer with network or Internet access, and the request will be routed directly into your iMaint system. Requests are submitted through easy-to-use Web page forms.

- Users do not need to be licensed iMaint users
- Optional automatic notification to specified iMaint users when request is received
- Optional notifications to person making the request—approval, work completed, etc.
